SUMMARY

Fourth-year Information Systems & Operations Management student at the University of Cincinnati who turns data and process insights into practical business results. Skilled in analyzing operations, mapping workflows, and communicating with technical and non-technical stakeholders alike, and in building efficient, well-documented processes that deliver measurable improvements.

EDUCATION

University of Cincinnati, Carl H. Lindner College of Business

Bachelor of Business Administration, Information Systems & Operations Management

Cincinnati, OH

Expected May 2027

PROFESSIONAL EXPERIENCE

Co-Founder & Developer — PopFeed

March 2026 – Present

AI-Powered Social Media Management Platform

- Co-founded and launched an AI-powered social media management platform serving real-estate agents, content creators, and small businesses.
- Designed and built the full-stack web application end-to-end with React, Vite, and Vercel, architecting it for automation and scalable growth.
- Owned product and brand from the ground up—defining the visual identity, user experience, and automated content workflows that set the platform apart.

Technology Solutions Intern — FST Logistics

May 2026 – July 2026

- Designed and automated business workflows that streamlined warehouse operations and reduced manual, repetitive tasks across teams.
- Wrote high-level SQL queries to retrieve, organize, and surface operational data, supporting reporting and analytics.
- Gained hands-on exposure to project management, data management, and infrastructure alongside Power BI reporting work.

PROJECTS

N8N AI Workflow Automation — IBM

February 2026

- Built a self-hosted, API-driven RAG (retrieval-augmented generation) agent in n8n that indexed a Google Drive library of IBM reports and returned fast, source-grounded answers to natural-language queries.
- Synthesized the agent's outputs into a data-backed strategic recommendations report for the company.

IQE Innovation Project

March 2024

- Conceptualized an original product and produced a showcase video, handling both filming and editing; the video placed in the top 5 of the cohort.

SWOT Analysis — Perfetti Van Melle

November 2023

- Collaborated in a four-person team to research and author a 30-page SWOT analysis of the confectionery company, leading the Strengths section and interviewing company representatives.
- Delivered a 15-slide presentation of the findings to an audience of students and Perfetti Van Melle employees.

ADDITIONAL EXPERIENCE

Server Assistant — The Precinct by Jeff Ruby

April 2025 – Present

Cincinnati, OH

- Welcome and seat guests in a high-volume fine-dining setting; manage reservations, waitlist, and floor plan to optimize table turns and guest flow.
- Coordinate with servers and expo to time courses, delivering food with accuracy, menu knowledge, and polished service.
- Anticipate guest needs—allergies, celebrations, VIP requests—and resolve issues with professionalism.

Summer Groundskeeper — Sycamore Creek Country Club

May 2022 – August 2024

Springboro, OH

- Operated and maintained complex equipment to keep a pristine course environment for 500+ monthly members.
- Led teams of 2–8 in mulching and mowing operations across large areas of the course.

SKILLS

Programming & Data: SQL, C#, JavaScript, HTML

Frameworks & Tools: React, Vite, Vercel, n8n, Microsoft Suite

Methodologies: Agile, Scrum, Waterfall, Lean Six Sigma
